**June 24, 2009**

**Lightning Safety Awareness Week is June 21-27**

Outdoor activities and the frequency of thunderstorms make summer the most likely time to be injured or killed by lightning, according to statistics compiled by NOAA's National Weather Service. In order to reduce lightning injuries and fatalities, the National Weather Service is promoting Lightning Safety Awareness Week the last week of June.

More than 70 percent of lightning fatalities occur between June and August.

Annually lightning strikes more than 400 people in the United States. About 60 of those die, and many more are left with devastating and permanent disabilities. The National Weather Service studies show men are struck far more often than women, sustaining about 85 percent of lightning deaths. And men under 40 account for 60 percent of all lightning fatalities.

To avoid being struck by lightning, the National Weather Service recommends that you:

- Get into a fully enclosed building or hardtop vehicle at the first rumble of thunder;
- Stay indoors for 30 minutes after the last thunder clap;
- Monitor the weather forecast when you're planning to be outdoors;
- Have a plan for getting to safety in case a thunderstorm moves in;
- Do not use a corded phone during a thunderstorm unless it's an emergency; cell phones are safe to use;
- Keep away from plumbing, electrical equipment and wiring during a thunderstorm.
- Remember—"when thunder roars, go indoors."
