

SANTA FE NATIONAL FOREST

RAINBOW FAMILY GATHERING

2009

INCIDENT ACTION PLAN

July 1, 2009

| | | | | | | | | | | | | |
|---|--|---|------------------------|---|--|---|---|--|--------------------------|---|---------------------------------------|--------------------------|
| INCIDENT OBJECTIVES | 1. Incident Name Rainbow Family Gathering 2009 | 2. Date 07/01/2009 | 3. Time 0700 | | | | | | | | | |
| 4. Operational Period 07/01/2009 Rainbow Unified Command Team Operational Period | | | | | | | | | | | | |
| 5. General Control Objectives for the Incident (include alternatives) <ul style="list-style-type: none"> • Provide for the safety and welfare of all incident staff through effective organization, good briefings, supervision within span-of-control, coordination of all resources, reliable communications, continuous situation awareness, and effective scene size-up prior to committing resources on any response. • Use all available resources and opportunities to show respectful regard for Rainbow Family participants. • Promote the safety and welfare of the public, protect infrastructure, and public property through Information and enforcement of laws. • Provide timely response to all appropriate requests for assistance. • Ensure that incident personnel follow established Department of Agriculture guidelines regarding civil rights, and other Forest Service policies, practices, and procedures. • Provide effective incident management training experience for all trainee positions. • Mobilize the needed resources to manage the event activity safely, effectively, and efficiently. • Provide timely and accurate information to internal audiences, all levels of media, local communities, affected agencies, and partners. | | | | | | | | | | | | |
| 6. Weather Forecast for Period <ul style="list-style-type: none"> • Keep informed of twice daily Santa Fe Zone Interagency Dispatch Center Forecasts. | | | | | | | | | | | | |
| 7. General Safety Message <ul style="list-style-type: none"> • Develop contingency planning to limit the potential spread of all infectious diseases, and to protect incident staff and the public from widespread exposure. • Observe driving regulations and personal limitations. • <u>Reduce speed by 25% on Forest Roads</u> • Honor Work/Rest requirements. (Work shifts restricted to 12 hours without IC prior approval). • Get adequate rest, hydration, and use your vitamins. • Santa Fe NF requires a hardhat to be worn anytime outside the vehicle when in the NF. | | | | | | | | | | | | |

SAFETY & HEALTH REMINDERS

2009 RAINBOW FAMILY GATHERING

Santa Fe National Forest

July 1, 2009

Keep up the safe driving, Limit speed to the road condition & situation and drive defensively. Always lookout for the other driver be prepared for the unexpected. Drive with your lights on. Watch out for animals on the road, and wear your seat belt.

Exercise safety and protective measures, Use gloves and germ killing skin gel. Watch out for edge weapons, and sharp objects. Properly dispose of contaminated items. Be prepared for the unexpected.

Know your backup and make sure of your Communications and other L.E. Units in the area.

L.E. officers safety at all times. Keep alert and tactically be prepared at all times. Always be aware of your surroundings. Use contact/cover techniques when out of your patrol vehicle. Arrest and transport by the book. After transport wipe or spray your vehicle with Lysol or decontamination wipes. And, clean handcuffs.

Few survival skills are more critical for LEO's than weapons retention.

L.E., support and assist other Law Enforcement agencies as needed.

L.E. units will assist and cover resource workers, and state public health people when they are in the area.

Resource personnel please continue to work in pairs or more. Check in and out with L.E. Officers, forest dispatch, or ICP. When parking and leaving your vehicle lock it up and let L.E. know where it is located. DON'T accept food or drink from participants of the gathering.

Always be aware of your surroundings, and if you feel unsafe leave the area. Watch out for each other. Do not leave your partner. Always have an ongoing escape route.

Be safe always and have a good day!

THANKS!
SAFETY

Current Conditions [Move Down]

Hazardous weather condition(s):

Hazardous Weather Outlook

Today: Isolated showers and thunderstorms after noon. Mostly cloudy, with a high near 85. South wind between 5 and 10 mph. Chance of precipitation is 10%.

Tonight: Isolated showers and thunderstorms. Mostly cloudy, with a low around 52. Southeast wind between 5 and 10 mph. Chance of precipitation is 20%.

Thursday: Isolated showers and thunderstorms after noon. Mostly cloudy, with a high near 86. East wind 5 to 10 mph becoming south. Chance of precipitation is 10%.

Thursday Night: Isolated showers and thunderstorms. Mostly cloudy, with a low around 52. South wind 5 to 10 mph becoming east. Chance of precipitation is 20%.

Friday: A 40 percent chance of showers and thunderstorms. Mostly cloudy, with a high near 82. East wind 5 to 10 mph becoming southwest.

Friday Night: A 30 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 51.

Independence Day: A 20 percent chance of showers and thunderstorms. Mostly cloudy, with a high near 85.

Saturday Night: A 30 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 49.

Sunday: A 20 percent chance of showers and thunderstorms. Mostly cloudy, with a high near 84.

Sunday Night: A 30 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 51.

Monday: A 20 percent chance of showers and thunderstorms. Mostly cloudy, with a high near 85.

Monday Night: A 20 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 49.

Tuesday: A 10 percent chance of showers and thunderstorms. Mostly cloudy, with a high near 85.

Near Gallup. Photo by Bill Noe

Lightning is the MOST UNDERRATED weather hazard. On average, only floods kill more people. Lightning makes every single thunderstorm a potential killer, whether the storm produces one single bolt or ten thousand bolts.

Over the past decade in the United States, lightning killed around 50 people a year, more people each year than both tomadoes and hurricanes! Tomadoes, hail, and wind gusts get the most attention, but only lightning can strike well outside the storm itself. Lightning is often the first thunderstorm hazard to arrive and the last to leave.

Rio Rancho, Photo by Chris Armijo

Lightning is one of the most capricious and unpredictable characteristics of a thunderstorm. Because of this, no one can guarantee an individual or group absolute protection from lightning. However, knowing and following proven lightning safety guidelines can greatly reduce the risk of injury or death. Remember, YOU are ultimately responsible

for your personal safety, and should take appropriate action when threatened by lightning

Photo by Matthew Gustke

What Actions Can I Take?

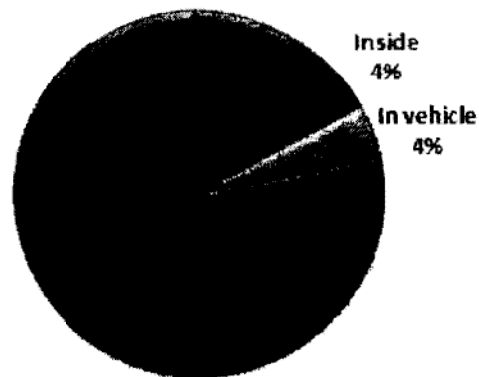

Lightning Safety:

- Watch for signs of an approaching thunderstorm
- Postpone outdoor activities if thunderstorms are imminent. This is your best way to avoid being caught in a dangerous situation
- REMEMBER if you can hear thunder, you are close enough to a storm to be struck by lightning
- Get inside a house, large shelter or an all-metal vehicle (not a convertible). If safe shelter is not available, find a low spot away from trees, fences, and poles
- If boating or swimming, get out of boats and away from the water, get to land and find shelter immediately
- Only use the telephone in an emergency (cell phones are safe to use).
- Remain clear of tall, isolated trees and telephone poles.
- Stay away from wire fences, clotheslines or metal pipes and rails.

Statistics for New Mexico

As shown in the diagram below, a vast majority (at least 78%) of lightning fatalities or injuries occur outside. It is clear why we stress to go inside a building for protection, or if you are in a vehicle, stay in there (except for a convertible).

NM Lightning Fatalities and Injuries

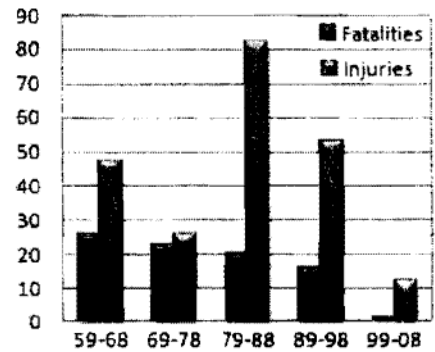

The diagram below further breaks down the fatalities and injuries into specific activities. Residents have lost their lives due to lightning during both work and recreational activities - from working in the fields or on a tractor, to riding horses, biking, hiking, or just simply walking outside. Many think that if they are out of the rain shaft of a thunderstorm they are safe - but lightning can strike miles from the main core of a thunderstorm.

NM Lightning Fatalities and Injuries - What Were They Doing?

- Working in Fields (6%)
- In Vehicle/ Tractor (7%)
- On Phone (1%)
- Riding Horse (5%)
- In Mountains/ Hiking/Camping (9%)
- Walking Outside/ in Open Fields (22%)
- Construction/ Working on Buildings (9%)
- Unknown (14%)
- Under/Near Tree (10%)
- Golfing/Golf Related (5%)
- Fishing (2%)
- At State Park (1%)
- At Lake (1%)
- In Residence (4%)
- At City Park (1%)
- Riding a Bike (1%)

NM Lightning Fatalities and Injuries Trends

The graph on the right breaks down the fatalities and injuries by decade. The fatalities show a steady decline from the 60s through 90s, with a sharp drop-off in the past 10 years. Injuries peaked in the late 70s and 80s and have dropped off considerably since. The recent trends illustrate a sharp reduction in fatalities and injuries, supporting the idea that the people of New Mexico have become much more educated on lightning and its potential dangers. This reduction in both fatalities and injuries has also been noted in the lightning statistics for the country - the average number of deaths per year using a 30-year average is 62, while for the past ten years the average has dropped to 44.

Lightning is one of the oldest observed natural phenomena on earth. At the same time, it also is one of the least understood. While lightning is simply a gigantic spark of static electricity (the same kind of electricity that sometimes shocks you when you touch a doorknob), scientists do not have a complete grasp on how it works, or how it interacts with solar flares impacting the upper atmosphere or the earth's electromagnetic field.

Lightning has been seen in volcanic eruptions, extremely intense forest fires, surface nuclear detonations, heavy snowstorms, and in large hurricanes. However, it is most often seen in thunderstorms.

Did you know?

- The air near a lightning strike is heated to 50,000 degrees F! That is hotter than the surface of the sun!
- The average flash could light a 100-watt light bulb for more than 3 months.
- At any given moment, there can be as many as 2,000 thunderstorms occurring across the globe. This translates to more than 14.5 MILLION storms each year. NASA satellite research indicated these storms produce lightning flashes about 40 times a second worldwide.
- Lightning occurs with all thunderstorms.

For much more information on lightning and lightning safety, click here to go to JetStream, the online school for weather.

2009 RAINBOW IAP MEDICAL PLAN

Emergency Procedures Checklist

1. Conduct Size-up of the situation to include:

- Nature of the problem, i.e., injury or illness.
- Number of people involved & crew identification.
- DO NOT give names of individuals over the radio
- Chief complaints, patient assessment (refer: to IRPG page 35).

2. Contact Santa Fe Dispatch Center

- Clear all radio traffic.
- Point of contact will relay patient information & type of evacuation requested.
- Point of contact will relay Lat. & Long. for pick up location or major landmark. Lat. & Long., UTM's or Legal location are required for Helicopter life flights.

3. For an ALS Med-EVAC Request:

- Point of contact will notify Incident Commander and Santa Fe Dispatch Center for ALS-EVAC.
(* See below for locations on Air Ambulances*).
- If an outside Air Ambulance is requested, Santa Fe Dispatch Center initiates call. Santa Fe Dispatch informs Incident Commander and point of contact on estimated time of arrival and destination of patient.
- Point of contact will inform Santa Fe Dispatch Center with patient lift-off.
- Non-emergency radio Communications resume when emergency is complete, Santa Fe Dispatch Center will announce to all units.

4. For a Medical Transport request:

- Incident Commander or point of contact will notify Santa Fe Dispatch Center for Medical Transport (*See below for locations Medical Transports*) request.
- Incident Commander or point of contact will identify and relay pick-up site.
- Santa Fe Dispatch Center will coordinate patient pick-up designated medical transport.
- Santa Fe Dispatch Center relays ETA to pick-up site.
- Santa Fe Dispatch Center will announce to all units to resume normal radio operations.

Hospitals/Clinics:

Nursing Response Strategic Plan:

[REDACTED], RN, BSN
[REDACTED], RN

1. Attend inter-agency briefings
2. Establish relationships with Forest Service, EMS, local hospitals and urgent care, Rainbow Family CALM
3. Provide a consistent physical presence at the gathering/establish trust and exchange of information to the extent possible with CALM workers
4. Assist DOH Epidemiology infectious disease surveillance, and intervention if necessary (e.g. sample collection, medication administration, isolation and quarantine)
5. Stock local Public Health Office with equipment specified by Epidemiology Department
6. Provide on-call support as needed
7. Participate in education outreach to Rainbow kitchens and CALM
8. Provide adult immunizations of Hep B and Hep A to Forest Service personnel as requested
9. Accompany Epidemiology teams to the gathering in order to provide a consistent contact and facilitate exchange of information.
10. Maintain regular contact and exchange of information with nurse managers at local Emergency Rooms in order to facilitate enhanced syndromic surveillance as recommended by DOH Infectious Disease Epidemiology Bureau.
11. Inform DOH Pharmacy and Laboratory staff as needed regarding laboratory sampling activities and any recommended distribution of medication.
