

SANTA FE NATIONAL FOREST

RAINBOW FAMILY GATHERING 2009

INCIDENT ACTION PLAN

July 2, 2009

INCIDENT OBJECTIVES	1. Incident Name Rainbow Family Gathering 2009	2. Date 07/02/2009	3. Time 0700
4. Operational Period 07/02/2009 Rainbow Unified Command Team Operational Period			
5. General Control Objectives for the Incident (include alternatives) <ul style="list-style-type: none"> • Provide for the safety and welfare of all incident staff through effective organization, good briefings, supervision within span-of-control, coordination of all resources, reliable communications, continuous situation awareness, and effective scene size-up prior to committing resources on any response. • Use all available resources and opportunities to show respectful regard for Rainbow Family participants. • Promote the safety and welfare of the public, protect infrastructure, and public property through information and enforcement of laws. • Provide timely response to all appropriate requests for assistance. • Ensure that incident personnel follow established Department of Agriculture guidelines regarding civil rights, and other Forest Service policies, practices, and procedures. • Provide effective incident management training experience for all trainee positions. • Mobilize the needed resources to manage the event activity safely, effectively, and efficiently. • Provide timely and accurate information to Internal audiences, all levels of media, local communities, affected agencies, and partners. 			
6. Weather Forecast for Period <ul style="list-style-type: none"> • Keep informed of twice daily Santa Fe Zone Interagency Dispatch Center Forecasts. 			
7. General Safety Message <ul style="list-style-type: none"> • Develop contingency planning to limit the potential spread of all infectious diseases, and to protect incident staff and the public from widespread exposure. • Observe driving regulations and personal limitations. • Reduce speed by 25% on Forest Roads • Honor Work/Rest requirements. (Work shifts restricted to 12 hours without IC prior approval). • Get adequate rest, hydration, and use your vitamins. • Santa Fe NF requires a hardhat to be worn anytime outside the vehicle when in the NF.

SAFETY & HEALTH REMINDERS **2009 RAINBOW FAMILY GATHERING**
Santa Fe National Forest

July 2, 2009

***Drive defensive at all times. - Limit speed to the conditions. – Safety belts -
Use headlights at all times– Clean Windshields and Watch out for animals
on the road.***

***Use good Safety and Protective measures – Gloves & germ killing skin gel.
Watch out for sharp objects, needles – Properly dispose of contaminated items in
Biohazard bags / sharps containers.***

***Mental alertness, recognize dangerous situations and hostile persons. Look out for
each other. Always be aware of your surroundings. Use contact / cover techniques.
Always have a planned escape route.***

***Use good Safety Skills. LEOs, arrests and transport by the book. After transport
wipe or spray your patrol vehicle with Lysol or decontamination wipes.
And, clean handcuffs.***

Support and assist other L.E. agencies as needed such as Vehicle Stops and etc.

***Resource workers – Must be in radio contact, check in and check out.
Communicate with Law Enforcement Officers. Always work in pairs or more.
Always be aware of your surroundings – leave if you feel unsafe or unsure.***

***L.E. units try to assist resource workers when they are in the area. Provide cover
for them as needed. Have them check in and out with you if they are walking in
the area***

***Law Enforcement Officers & Resource workers “Safety Comes First”.
Slow down and make sure you have good communications.***

Follow all Safety Procedures – Let Common Sense Prevail!!!

***Thanks!
Safety***

Hazardous weather condition(s):

Hazardous Weather Outlook

Today: Isolated showers and thunderstorms after noon. Partly cloudy, with a high near 85. South wind between 5 and 10 mph. Chance of precipitation is 10%.

Tonight: Isolated showers and thunderstorms. Mostly cloudy, with a low around 53. South wind around 10 mph. Chance of precipitation is 20%.

Friday: Scattered showers and thunderstorms. Mostly cloudy, with a high near 81. South wind between 5 and 10 mph. Chance of precipitation is 40%.

Friday Night: Isolated showers and thunderstorms. Partly cloudy, with a low around 53. South wind 5 to 10 mph becoming east. Chance of precipitation is 20%.

Independence Day: Isolated showers and thunderstorms. Mostly cloudy, with a high near 85. Calm wind becoming north between 5 and 10 mph. Chance of precipitation is 20%.

Saturday Night: Scattered showers and thunderstorms. Mostly cloudy, with a low around 51. Chance of precipitation is 30%.

Sunday: A 10 percent chance of showers and thunderstorms. Mostly cloudy, with a high near 87.

Sunday Night: A 20 percent chance of showers and thunderstorms. Partly cloudy, with a low around 49.

Monday: A 10 percent chance of showers and thunderstorms. Mostly cloudy, with a high near 87.

Monday Night: A 20 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 50.

Tuesday: A 10 percent chance of showers and thunderstorms. Mostly cloudy, with a high near 88.

Tuesday Night: A 20 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 51.

Wednesday: A 20 percent chance of showers and thunderstorms. Mostly cloudy, with a high near 88.

City, St

This shows the most recent image of the United States, taken from a NOAA satellite. This image is taken in the infrared band of light and show relative warmth of objects. Colder objects are brighter and warmer objects are darker. Lower layers of clouds, generally warmer and lower in altitude, are colored gray. Colder and generally higher clouds tops are highlighted in colors. IR imagery is useful for determining cloud features both at day and night.

Meth Lab Hazards

- **One Pot Method**

One-Pot Methamphetamine Cooks Pose New Danger

Law enforcement in Southern Illinois are reporting that they are finding full blown methamphetamine cooks taking place in Coleman fuel cans.

The cans are testing positive for anhydrous ammonia and are under pressure causing problems, such as explosions and inhalation hazards. Inexperienced officers have picked these items up and moved them around without knowing the dangers involved in doing this.

This method began appearing late last spring in a few states (Washington, Arkansas, Mississippi and Florida) but it is now spreading elsewhere.

Methamphetamine cooks using the "one-pot" method combine the anhydrous ammonia (or fertilizer from which it is extracted), the pseudoephedrine tablets, water, and the reactive metal (ie. Lithium), into one container from the beginning of the process.

Ex. (b)(6) + PA

The idea is to reduce the amount of time needed for the overall process. The danger to subjects and to law enforcement is due to the mixing of all of the ingredients in the one container.

The concentration of products builds up the ether pressure within the sealed container to levels beyond which the containers were not built to withstand. The building pressure can create a rupture or bursting of the container exposing the ingredients within to the air. Beyond the damage from the bursting container, exposure of items such as lithium to the air then creates further explosive danger.

The growing use of the one-pot method increases the danger to law enforcement and civilians from explosions, fires, and exposure to dangerous chemicals.

It is recommended that individuals who encounter what appears to be a "one-pot" cook take all proper precautions for fire and chemical explosions and do not approach the lab. Call law enforcement and hazmat coordinator.

K-Mart Meth Lab Creator CAUGHT!

Last week, a [REDACTED]-year-old [REDACTED] of Georgia went into his local K-Mart and started buying classic meth-making supplies. Then, he was so desperate for a fix that he couldn't even make it home ... so he set up a lab in the K-Mart bathroom. He was arrested for possession of items to manufacture methamphetamines and possession of a controlled substance.

2009 RAINBOW IAP MEDICAL PLAN

Emergency Procedures Checklist

1. Conduct Size-up of the situation to include:

- Nature of the problem, i.e., injury or illness.
- Number of people involved & crew identification.
- DO NOT give names of individuals over the radio
- Chief complaints, patient assessment (refer: to IRPG page 35).

2. Contact Santa Fe Dispatch Center

- Clear all radio traffic.
- Point of contact will relay patient information & type of evacuation requested.
- Point of contact will relay Lat. & Long. for pick up location or major landmark. Lat. & Long., UTM's or Legal location are required for Helicopter life flights.

3. For an ALS Med-EVAC Request:

- Point of contact will notify Incident Commander and Santa Fe Dispatch Center for ALS-EVAC.
(* See below for locations on Air Ambulances*).
- If an outside Air Ambulance is requested, Santa Fe Dispatch Center initiates call. Santa Fe Dispatch informs Incident Commander and point of contact on estimated time of arrival and destination of patient.
- Point of contact will inform Santa Fe Dispatch Center with patient lift-off.
- Non-emergency radio Communications resume when emergency is complete, Santa Fe Dispatch Center will announce to all units.

4. For a Medical Transport request:

- Incident Commander or point of contact will notify Santa Fe Dispatch Center for Medical Transport (*See below for locations Medical Transports*) request.
- Incident Commander or point of contact will identify and relay pick-up site.
- Santa Fe Dispatch Center will coordinate patient pick-up designated medical transport.
- Santa Fe Dispatch Center relays ETA to pick-up site.
- Santa Fe Dispatch Center will announce to all units to resume normal radio operations.

Nursing Response Strategic Plan:

[REDACTED], RN

1. Attend inter-agency briefings
2. Establish relationships with Forest Service, EMS, local hospitals and urgent care, Rainbow Family CALM
3. Provide a consistent physical presence at the gathering/establish trust and exchange of information to the extent possible with CALM workers
4. Assist DOH Epidemiology infectious disease surveillance, and intervention if necessary (e.g. sample collection, medication administration, isolation and quarantine)
5. Stock local Public Health Office with equipment specified by Epidemiology Department
6. Provide on-call support as needed
7. Participate in education outreach to Rainbow kitchens and CALM
8. Provide adult immunizations of Hep B and Hep A to Forest Service personnel as requested
9. Accompany Epidemiology teams to the gathering in order to provide a consistent contact and facilitate exchange of information.
10. Maintain regular contact and exchange of information with nurse managers at local Emergency Rooms in order to facilitate enhanced syndromic surveillance as recommended by DOH Infectious Disease Epidemiology Bureau.
11. Inform DOH Pharmacy and Laboratory staff as needed regarding laboratory sampling activities and any recommended distribution of medication.

Subject RE: Concern for elk and deer impacts by Rainbow Gathering
and ATV's

Tom, thanks for sharing the concern from Mr. [REDACTED] about impacts to elk and deer during calving and fawning season due to the Rainbow Gathering and ATV's on the Santa Fe National Forest. I need to correct earlier information on the status of the Gathering. The group does have a permit for their stay.

Ex. (b)(6) & PA

Although they have successfully won in court in past years, and have not had a permit in several years, they signed one this year. The permit requires rehabilitation of surface disturbance caused by the Gathering. I am forwarding this message with Mr. [REDACTED] e-mail to Ray Borrego, Wildlife Biologist at Cuba Ranger District.

Prior to the arrival of the first group, Ray coordinated with New Mexico Department of Game and Fish who visited the location. They did not propose additional mitigations beyond what is included in the permit. In speaking with Ray, he said that although elk and deer were displaced at Bosque Vennado, the site of the Gathering, they are finding plenty of good forage and nursery habitat within other areas of San Pedro Parks. The Parks are comprised of a series of large meadows intermixed with forest. Although there are short term impacts to elk and deer during calving and fawning, the area will be rehabilitated by August. All of the Rainbow participants will be out of Bosque Vennado by the end of August. There should not be any interference with the September archery hunt.

The Santa Fe National Forest is currently planning travel management and may take Mr. [REDACTED] comments regarding ATV impacts into consideration.

If you would like more information, Ray would be happy to talk with you. His number is (575) 289-3264.

Subject RE: Jemez Mountains elk

Brandon,

I have personally experienced the Rainbow Family of the Living Light. The first was outside Lander, the second was near Big Piney and the last was in the Upper Green River. We too were overwhelmed by the sheer number of people that would be invading these areas and were concerned about all kinds of resource damage, from grass trampling to stream pollution to poaching! Most of our worries were not realized, thankfully! From a resource standpoint, the group did a fairly good job of cleaning up after their celebration. They were required by USFS to rehabilitate the area with seed mixes approved by USFS on trails and camping areas that were trampled in to the point native vegetation was harmed or removed. My experiences were that the rehab work was done well and by the end of summer and certainly by the middle of the next summer, the area showed little sign of the large number of folks who were in the area for a short time. We too were concerned about the impact on wildlife, especially the late calving and nursery areas that cow elk and their offspring used in these areas. We could not measure adverse effects although I am certain there could have been some that we could not observe. About a month after the celebration, we started seeing elk and deer using the area and the following summer saw what we would consider normal distribution on and around the camping site area.

There was always an issue of permits and party sizes. Standard for USFS at the time was no more than 40 persons in a group and no more than 14 days in the same same campsite or drainage. I learned this morning that those are no longer issues. Congress passed special legislation several years ago

Ex. (b)(6) & PA

specifically for the Rainbow Family that precluded them from the USFS permit requirement, length of stay and party size. The USFS does monitor their activities for violations of Forest Service regulations and other agencies monitor other state and federal rules, regulations and laws.

As for the ATV use, that is a growing problem for much of elk country. A few folks seem to ruin it for everyone else and the RMEF has spent a lot of resources encouraging responsible use and we have even contributed funding to closing illegal roads and trails along with funds for restoring the native grasses, forbs and shrubs that had been disturbed. We can only encourage the enforcement of the rules and regulations by the various agencies to slow down their impact on elk country.

Best regards!

Tom,

Here is another situation. Last year the Rainbows were on the BTNF and as I understood the situation, there was not much the FS or BLM could do to stop them. A lot of political stuff going on. Do you have response ready to go for the Rainbow situation?

Subject: Jemez Mountains elk

I am very concerned about the Rainbow group that will be in the Jemez mountains this coming week, up to 12,000 people in the Elk calving and a deer fawn area - Park Vernado, Rock Creek Mesa, Forest roads 103 and 69 up to 69 and road 70, the west side of Mining mountain.

I don't know why the Forest Service is letting them do there gathering there, one of the worst place to have

a group that big in the whole Cuba ranger district.

Stop this from happening. This is insane, There are other areas that would be less of an impact for this group to use.

I am a hunter and a life time resident who knows that area well, also I have spent time up there in the past few weeks and have seen a lot of elk, deer and there newborn. With this large of a group this many days right in the middle of there home it will push all the big game animals out and ruin that whole area for a long time and may take a few years for the animals to use that area for a spring newborn area again.

Also there has been a group of atvs driving every old logging road to make a path over burms or around them and remove fallen trees to open all the roads, this is what they said they were doing but would not say why, but would open all roads weather they were closed by burms or not. they are also making there own roads, which go through steams and down streams along the wilderness trials and ruining the whole area. To have atv trails and roads every few hundred yards all over the forest will remove all big game animal life, look at unit 6c where dirt bikes and atvs roam that whole area- and have disrupted a delicate habitat area for years now.

That whole area of the south and east of the San Pedro Wilderness is a very delicate area, great habitat and should be protected some how.

Please work with the Forest service to do something about the large groups like the Rainbow group and the Atv and off road group that could care less about the impact that they all have.

Thank you for your time.
